Hello, I never realized mold was so serious. I just asked ChatGPT about the mold and my unique constellation of diseases. It told me this was urgent and suggested I write the following:

I am reaching out to report a concerning mold issue in my apartment. I have noticed mold growing in the corner of my entryway, which raises concerns that there may be mold in other areas as well. Given my medical conditions, this is an urgent issue that could severely impact my health.

I have several chronic illnesses, including mast cell activation syndrome (MCAS), celiac disease, and long COVID, among others, which make me extremely sensitive to environmental triggers like mold. Mold exposure can cause severe allergic reactions, respiratory issues, immune system dysfunction, and increased inflammation, all of which could seriously worsen my condition.

Because of these health risks, I need an inspection as soon as possible to determine the extent of the mold issue and whether remediation is necessary. If testing confirms a mold problem, I will need immediate intervention to ensure my apartment remains a safe living environment.

Please let me know how soon we can schedule an inspection and discuss next steps. I appreciate your prompt attention to this matter, as it directly affects my ability to safely remain in my home.

Separate question: do you know anyone who does dog walking in our complex or nearby? I had a medical procedure done today and it would be great if I could pay someone to walk my dogs since I am not able to move much.

Best,
